

PRODUCT FEATURES

Accuracy 3 mm / 10 m. Laser power ≤ 1 mW. Laser wavelength 515–520 nm. Green laser is 4 times more visible than a standard red laser. Laser class 2. Operating range up to 20 m. Automatic adjustment range 3° - self-levelling. Battery 2800 mAh Li-Ion. Easy measurement and ability to switch on a horizontal and/or vertical laser beam. Lock for angled work. A screw-on level holder enables an easy and safe fix to the stand. A strong magnet also enables to mount the laser to vertical metal members. Rotating head. Tightness class IP54 provides accurate protection under working conditions. The set includes glasses improving laser viewing, a laser target (facilitating positioning structural components in reference to the laser beam), and micro-USB battery charger. Packed in a durable bag facilitating transport.
