

PRODUCT FEATURES

The anti-dust curtain is used to separate rooms where renovation and construction works are carried out. Made from transparent PE foil with high mechanical strength and resistance to factors arising during renovation works, such as: dust, water, paints and odors. The „L” curtain opening type has no threshold, which enables free passage between rooms, e.g. with a vacuum cleaner, trolley, etc. Double zipper enables easy and quick access to the rooms from both sides. Delivered with a painting tape, 10 m long and 30 mm wide and with sticked velcro fastener, thanks to which the curtain can be fully open. Designed for multiple use.
