

BRICKLAYER LINE WITH HANDLE

PRODUCT FEATURES

It is used during the implementation of various projects in the construction industry, mainly in bricklaying, paving and painting works. Designed to mark straight lines, i.e. verticals, horizontals and angles on various surfaces. It is made of high-quality polypropylene fibers with high tearing strength and tensile resistance, the fibers do not absorb water and are resistant to various weather conditions. The movable handle ensures ergonomic grip and comfort of use.
